

"You should call it *D*, not *Z*," said Achilles.
"It comes *next* to the other three. If you accept
A and B and C, you *must* accept *Z*."

"And why *must* I?"

"Because it follows *logically* from them.
If A and B and C are true, *Z must* be true.
You don't dispute *that*, I imagine?"

"**If A and B and C** are true, *Z must*
be true," the Tortoise thoughtfully repeated.
"That's another Hypothetical, isn't it? And, if I
failed to see its truth, I might accept **A and B**
and C, and *still* not accept *Z*. mightn't I?"
