Virtual Floppy Drive**Insert Virtual Floppy****Insert Virtual Floppy**

This option allows you to remotely insert a floppy diskette image into the Compaq Remote Insight Lights-Out Edition Virtual Floppy Drive.

Please use the following steps:

1. Create a floppy diskette image with the Compaq Diskette Image Utility.
2. Type in the name of the image file below, or browse to find the file:
3. Press the Insert Image button to upload the file to the Compaq Remote Insight Board Virtual Drive.
4. Use the Virtual Floppy Status Page for setting Virtual Floppy options.
5. Reboot the server or continue the current Virtual Floppy session.

Note: Detailed help and the Compaq Diskette Image Utility can be found at www.compaq.com/lights-out.
